

# PREFAB & FABRICATION

## Steel Fabrication

Our bespoke fabrication and in-house design team have the capabilities to provide:

- Secondary steelwork
- Pipe bracketry
- Pump skids
- Roof support frames
- Step overs
- Gantries and chiller bases

Engineering calculations also available as required.

## Unistrut Brackets

We also undertake full take off and prefabrication of unistrut run out brackets complete with marked up drawings. Each bracket is marked and numbered with drawing location.

The benefits of prefabrication include:

- Reduced site installation time and onsite labour requirements.
- On site health and safety issues reduced
- Controlled workshop environment ensures quality
- Work is unaffected by site conditions
